

Splitting bills made easy.

PRODUCT DESIGNER | APP DESIGNER

Settle up is an easy app to track small debts amongst friends. It organizes and tracks who has been paid and by what amount. Easily connect your account to the app and request money or pay friends with one click and no service fees. Sharing expenses has been made easy to allow other keep track and be accountable to those around you.

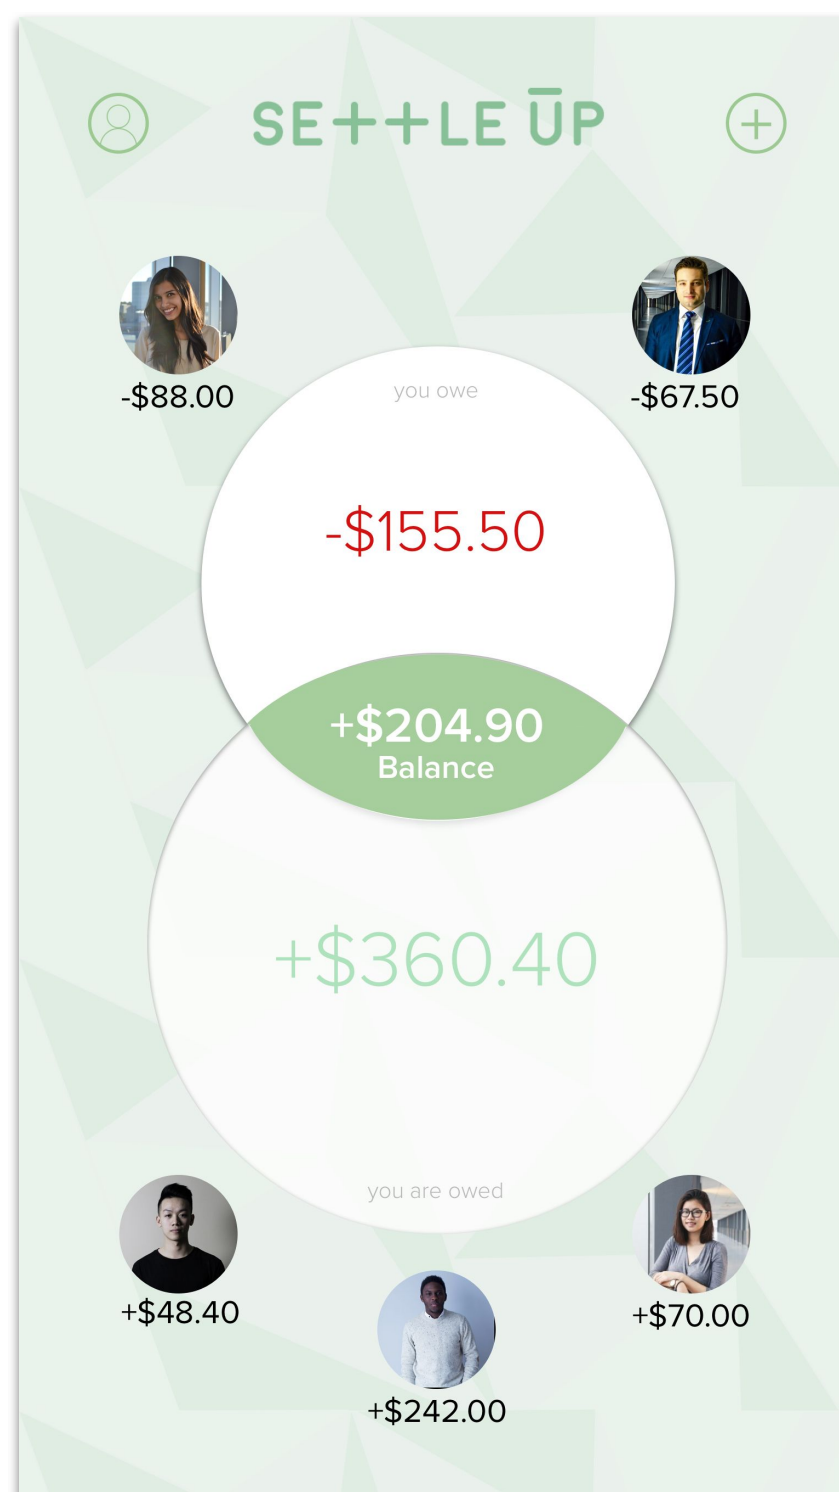

Motivation

Having a large amount of friends is fun sometimes but when it comes to splitting bills it is a bit of a head ache. In most cases one person usually ends up covering for others and majority of times they dont get paid back because of a lack of track record of small loans. I looked to designing something simple that my friends and I can benefit from.

MAIN FEATURES

See friends

From the main page it is easy to see who you owe and who is owing you money. The difference is also shown so you know what you will be getting back after settling up all outstanding loans.

Easy Calculations

Settling up makes things easy for you and also transfers loans when necessary if there is a mutual payee. The value displayed has taken into account the network of friends you have and their debts and easily allocates what is specifically yours to settle or redeem.

Requeat and Pay

Easily notify others when they are overdue for payments or just a simple reminder to pay up. In addition pay other directly from the apple and it will automatically update both accounts with expected balances.

Balance

+\$204.90

You owe Kanika - 19 Apr 2016

-\$88.00

You owe Daniel - 14 May 2016

-\$67.50
